California - Combination Work Zone Traffic Control Technician & Flagger Training Course (1 day)

COURSE DESCRIPTION

This course is an introduction to the basic principles of temporary work zone traffic control and traffic control flagging. This comprehensive, one-day training course is designed to instruct the student on the basic fundamentals of traffic controls in accordance with the current California Manual on Uniform Traffic Control Devices (MUTCD) (Referred to in the California Vehicle Code, Section 21400).

NOTE: The California MUTCD and Cal/OSHA, CSO Section 1599 states, "Only individuals trained in the principles of traffic control and/or traffic control flagging should be assigned that responsibility at work sites."

This one day course provides the student with the practical knowledge needed to properly install and maintain a California temporary work zone traffic control system. The flagger training comports with all the elements contained in California's regulations for traffic control flagging. Each student will be instructed to meet or exceed the minimum traffic control system requirements, to make system adjustments when necessary, and to provide for the safe passage of vehicles through the work zone.

Although this is not a personal safety course, personal work zone safety is emphasized. Students are required to complete a 25-question quiz. The correct answers for each question will be reviewed during the class. Also, the class will review and study solutions for a 6-case study, traffic control, work zone, work problems.

QUALIFIED INSTRUCTION

Cal Cone Zone Instructors, LLC has over 40 years of experience in all phases of city, county and state highway/freeway work zone construction. There will be direct instruction, group discussions, and audio-visual presentations. Each student will receive a Work Area Traffic Control Handbook (WATCH), pens and paper. **A high quality business card size CERTIFICATE OF COMPLETION will be presented to each student to officially acknowledge their successful participation in this comprehensive work zone training course.**

This course has been reviewed and endorsed by the Flasher Barricade Association.

**SPECIAL
FBA RATE!**
